Credentials and Return URL.

You can find this information in your Pagadito Merchant Account (Live or Sandbox) when you are logged in at section **Technical Configuration -> Integration Parameters -> Connection Credentials**.

The screenshot shows the Pagadito Merchant Account dashboard. At the top, there are four buttons: "Recarga de Saldo", "Retiro de Saldo", "Envío de Fondos", and "Admin. Tarjetas". Below these is the "Mi Pagadito" section, which contains a table with four columns: "Saldo Disponible" (USD \$ 0.00), "Fondos por Recibir" (USD \$ 0.00), "Pagos por Efectuar" (USD \$ 0.00), and "Otras Transacciones con Tarjetas de Crédito/Débito". Below the table are sections for "Información Pagadito Comercio" (with fields for Name, Activity, Country, Department, and City) and "Bandeja de Mensajes" (with a "Contactar a Equipo Pagadito" link). A "Configuraciones" section is also visible, with a "Credenciales de Conexión" button highlighted.

First, you have to configure Return URL. Like is shown:

http://www.mitienda.com/index.php?option=com_virtuemart&view=pluginresponse&task=pluginresponsereceived&token={value}

Change only "http://www.mitienda.com" by your URL and leave the rest. Now, copy and paste UID and WSK credentials at Pagadito configurations. Be sure you do not copy spaces.

The screenshot shows the Pagadito configuration page. The "URL de Retorno" section has a text input field containing "http://www.mitienda.com/index.php/pagadito/mpgc/return?p={value}" and a "Cambiar URL" button. Below this are examples of valid URL formats and a note: "(Nota: Se deben usar las llaves)". The "Credenciales de Conexión" section has a text input field for the UID, a text input field for the WSK, and a "Cambiar Credenciales" button.
