© 2017 Pagadito, S. de R.L. All rights are reserved.

Installation

- 1. The download has the following files:
 - pagadito/
 - o API/
 - Pagadito.php
 - o assets/
 - images/
 - icons
 - o black.png
 - o colors.png
 - o white.png
 - icon.png
 - logo_pagadito.png
 - o class-wc-gateway-pagadito.php
- 2. Enter to the administrator of your Wordpress website.

By default you enter through the URL of your website:

www.misitioweb.com/wp-admin/(change "misitioweb" by your website)

Username
Password
Remember Me Log In

3. Now make click on **Plugins->Add New->Upload Plugin**, choose the downloaded file and click on **Install Now**.

If you have a p	ugin in a .zip format, you may install it by uploading it h	nere.
	Browse plg_woocommerce_2.0.1.zip Install Now	

4. Plugin is installed, but you have to enable it, for this go to **Plugins->Installed Plugins** and click on **Activate**.

Configuration.

5. Once you have installed plugin in Wordpress, you have to activate and configure the payment module in WooCommerce, for this go to:

WooCommerce->Settings->Checkout->Pagadito

6. At this page, complete the information according to your Pagadito Account. When finish configuration, save changes, clicking on the Save Changes. Now, each field is explained:

Activar/Desactivar Allows to activate or deactivate payment processing with Pagadito.

Titulo	Title that appears at payment page. If this text is empty, it will be shown only the icon.
Mensaje al cliente	Message embedded to the title which will be shown at payment page.

© 2017 Pagadito, S. de R.L. All rights are reserved.

- Logo Pagadito Allows to choose the Pagadito Logo which will appear at the payment page.
- **Depuración** Save event logs and errors generated by Plugin Pagadito (not recommended for high activity websites).

Connection Credentials:

UID	User ID of Pagadito Merchant Account.
WSK	Connection key for werbservice of Pagadito.
Modo Sandbox	Allows to activate or deactivate connection to Sandbox, a testing environment.

NOTE:

We recommend to make testing in **SandBox Mode**(testing mode) before you active the Live Mode at Pagadito. For each mode, the UID and WSK have to be changed. For this you need a Pagadito Account for each one.

When Plugin is configured, you will be able to see it working in your website when user is confirming order.

Pagadito Pagadito Pagadito le permite Pagar en confiable.	nea de una manera segura, fácil y	

Credentials, Return URL and Webhooks.

You can find this information in our Pagadito Merchant Account (Live or Sandbox) when you are logged in at section **Technical Configuration -> Integration Parameters ->Connection Credentials**.

You can copy and paste UID and WSK credentials in Pagadito configurations.

Credenciales de Conexión		
Estas son las credenciale	es con las cuales su plataforma deberá autenticarse con Pagadito para solicilitar el cobro a un cliente.	
Evite cambiar estos valor anterior.	res a menos que que esté seguro de desear hacerlo, ya que su accion es inmediata y no puede ser restaurada a un estado	
UID	128e5574ff0ae5d46166dc772765c053	
WSK	2f02ffae7f7f9c429df496b84ea99aa9	
Cambiar Credenciales		

Configure **Return URL** in the following way:

Change only "http://www.mitienda.com" by your URL and leave the rest.

In example.

http://www.mitienda.com/?wc-api=WC_Gateway_Pagadito&token={value}&order_id={ern_value}

If you have customized the URLs in Wordpress, your new return URL may be like this:

http://www.mitienda.com/wc-api/WC_Gateway_Pagadito/?token={value}&order_id={ern_value}

URL	de Retorno
Ingres	e aquí la dirección URL adonde desea que Pagadito envíe a su cliente una vez halla realizado el pago en nuestra plataforma.
URL	http://www.mitienda.com/?wc-api=WC_Gateway_Pagadito&token={value}ℴ_id
Forma	tos validos:
http://w	ww.misitio.com/pagina.php?parametro1={value}¶metro2={ern_value}
En este (Nota:	e caso el token es el parámetro >> {value} << y el número de comprobante es el parámetro >> {ern_value} << Se deben usar las llaves)
Carr	ibiar URL

Enable Webhooks

Webhooks are processes that make updates of the status in an asynchronous way. It is not necessary user return to the merchant's website to finish order. To enable it go to Technical Configuration -> Webhooks, enable the mark and enter the listener URL. These are some examples of the listener URL. First , in case you use friendly URLs and second, in case they are not available (change "http://www.mitienda.com" for your website's URL):

http://www.mitienda.com/wc-api/WC_Webhook_Pagadito

Or

http://www.mitienda.com/?wc-api=WC_Webhook_Pagadito

Webhooks		
Los Webhooks per información necesa	miten que Pagadito notifique a su Comercio en una URL, los eventos de cambios de estado de las transacciones de pago, que realice con su comercio. Puede encontrar toda la ria de cómo funcionan, para qué sirven y cómo integrarlos en nuestra Guía General de Webhooks.	
Configuració	n de Webhooks	
Mabilitar el er	vío de notificaciones vía Webhooks.	
Por favor asegúres actualizada y ser r	e de haber ingresado la URL correcta, para recibir Webhooks cuando se producen los eventos de cambio de estado de las transacciones de su cuenta. Debe mantener la URL sponsable de la seguridad de la data transmitida vía Webhooks.	
Webhook URL: h	ttp://www.mitienda.com/wc-api/WC_Webhook_Pagadito	
Guardar Car	celar	

Webhooks do not require additional configurations in your website.

In any doubt, please contact our Developers Team at email developers@pagadito.com or by phone at +503 2264-7032
